

Github sketch uploader

Demo!

Technical discussion:

- Binaries in git??
- Tried multiple ways of capturing image. Ended up with Camera Intent
- Talks to Github API through eclipse library.
 - Uses personal access token
 - Images sent as base64 encoded strings
 - Sending is a multi-step process

TODO:

- Compression
 - Level of compression.
 - Showing file size.
 - LOC of source code of similar size (a picture says more than a thousand words?)
- Localization
- Interactive tutorial upon first startup that sets token
- Better UX by fully utilizing Github API
 - Testing of token
 - Fetching info about user
 - Suggesting repositories / branches
- Design
- Taking multiple pictures and uploading as single commit
- Release!
